Odenkirk Private Limited | Software Developer Internship Sep 2024 - Nov 2024

Project 1

Built a dynamic map interface with Leaflet, adding markers, polylines, clusters, and GeoJSON layers. Generated unique IDs for 3,000+ markers using UUID. Designed color-coded layers and made components fully responsive till 320px.

Project 2

Redesigned and implemented a responsive website UI from Figma, ensuring compatibility across all screen sizes.

Project 3

Updated components to a new UI, created sign-up pages with password validation.

P R O J E C T S

PDF-bot

Users can upload PDFs, ask questions about them, and get answers through a chat interface powered by LlamaIndex. The tool uses a React frontend, supports CORS, and enables AI-driven document Q&A. Server wake-up time: 50 secs.

[CLICK TO VIEW](#)

ORM

A customer and order management system where authenticated users can add customers with basic contact info, Create orders from a customisable product catalog, Filter orders by status, customer, or category, Update order statuses Add new products with images. Server takes 50 seconds to wake up.

[CLICK TO VIEW](#)

Movies wiki

Built a movie application with a RESTful API, integrating an external movie API to fetch movie details and dynamically display YouTube trailers. Implemented CRUD, JWT-based authentication and deployed it on the cloud. Wake-up time: 50 secs.

[CLICK TO VIEW](#)

Quiz App

Built using React.js for the frontend, Node.js with Express for the backend, and MySQL for the database. Max wake-up time 50 secs or reload the page
