Full Stack Developer

Movies wiki

Developed a MERN stack movie exploration app featuring secure user authentication via JWT with RSA256 encryption. Integrated external API for fetching popular movies/TV shows displayed in a carousel format. Implemented search functionality for specific titles, interactive trailers for user engagement, and pagination for optimal performance with large datasets. Utilized React.js, Express.js, MongoDB, Material UI, and Lottie for frontend/backend development. Emphasized security with password hashing using salt rounds. Deployed on Render

Front-End

Designed and developed an interactive online resume using HTML, CSS, and JavaScript, with the integration of the HTML2PDF library for PDF generation. Ensured cross-browser and device compatibility with responsive design. Designed the resume to be printer-friendly, with the ability to scale down for A4-sized printing.
